

Key Action: Learning Mobility of Individuals
Action Type: Mobility of young people

Project Title

Multiculture in One World:My Own Technology - 2

Project Coordinator

Organisation HATAY FOUNDATION
Address Dlkmen Street 566/9 , 06450 Ankara , Ankara , TR

Project Information

Identifier 2021-1-TR01-KA152-YOU-000004285
Start Date Nov 2, 2021
End Date Jan 1, 2023
EC Contribution 29,990 EUR
Partners DRUŠTVO AKADEMIJA ZA RAZVOJ MLADIH - ARM (SI) , ASOCIATIA TARABOSTES - DEZVOLTARE PRIN EDUCATIE - A.T.D.E. (RO) , JOVESOLIDES Egypt (EG) , Association for Cultural and Educational Development YOUTH ON BOARD (MK) , Associação Inspira! - Intervenção juvenil e ambiental (PT)
Topics Awareness about the European Union ; Digital youth work ; International relations and development cooperation

Project Summary

Objectives

As Hatay Foundation, we know that Technology and Digitalization and Sustainable Technology are indispensable for the global world. We included the economically and socially disabled young people, who are the future of tomorrow, into our project, enabling them to meet the Digital World and Technology and enable them to actively participate in life. Thus, we aimed to develop young people's perspectives on the technological world.

Implementation

We included successful young people from Slovenia, Portugal, Egypt, North Macedonia, Romania and Turkey, who have economic and social barriers, into the project activity.

8 people participated from each country in our project. A total of 48 young people participated in our project. As project activities, trainings were given on issues related to the innovations brought by Technology and Digitalization. Young people did their workshops by brainstorming about the innovations brought by technology to health, transportation and education. We divided the participants into 6 groups. Each group carried out their workshops on the subject. We gave their medallions to the best first, second and third groups.

Achievements

With our project, young people understand the importance of technology and the importance of digitalization. Young people from different countries got to know the cultures of young people from other countries. They learned what Erasmus Plus projects are, what is European Value and culture, and what is Youthpass through our presentations. Participants got involved by getting to know European Citizenship through our project activity. As 5 partners from Europe participated in our project, we increased the impact of the project by including more participation of many Mustafa Kemal Universities, Iskenderun Technical University and Municipalities locally. By inviting local and national journalists, we ensured that our project was sustainable and dissemination by ensuring that everyone heard it. Thus, we ensured that more young people benefited from the successful outputs of the project.

Our project has increased its impact and dissemination at both local, national and European level, with the social media we have made, the local press, as well as the sharing of universities and projects partners in Hatay.
